github.com/devendrathecoder | naviti.xyz

Entrepreneurial software engineer and 1st-year Electrical Engineering student at College of Technology and Engineering, Udaipur. Proven experience taking concepts from idea to market, including developing a live gym management SaaS (FitOps) with an active B2B subscriber. Founder of a web development agency (Naviti) delivering custom, high-performance digital solutions. Adept at full-stack development and passionate about building user-centric, scalable products.

EXPERIENCE

2026 – PRESENT

FitOps | Udaipur, India

Founder & Lead Developer

- Developed and deployed a comprehensive full-stack gym management solution from scratch to serve independent fitness businesses.
- Secured the first paying gym owner subscriber, actively managing client relationships and incorporating continuous product feedback.
- Architected a highly scalable, serverless backend infrastructure using Supabase and Firebase.
- Engineered a responsive, high-performance user interface utilizing modern frontend frameworks like Next.js and Vue.

2025 – PRESENT

Naviti (Web Agency) | Udaipur, India

Founder & Web Developer

- Established a digital agency focused on providing custom-built websites and CRM solutions for local businesses.
- Designed and delivered the full public-facing website and personal CRM software for AMPM Fitness.
- Managed the full software development lifecycle from client acquisition to deployment using Next.js, Vue, and Bootstrap.

KEY PROJECTS

- Hare Krishna Trust & Charity Portal: Developing a public-facing website and an internal data analytics dashboard to track, manage, and visualize charity operations and metrics.
(<https://hare-krishna-trust.vercel.app>)
- AMPM Fitness CRM: Custom lead generation and member management platform (ampmfitness.vercel.app).
